

AUTOMOTIVE SALES ANALYSIS

Final Questions & Key Insights • Sales Performance Report

TOTAL VEHICLES	TOTAL REVENUE	AVERAGE PRICE
23,906	\$671,525,465	\$28,090.25

KEY FINDINGS

01	Which dealer sells the most vehicles?
	Progressive Shippers Cooperative Association No — 1,318 vehicles.
02	Which region generates the highest revenue?
	Austin — approximately \$117,192,531.
03	Which manufacturer dominates sales?
	Chevrolet — 1,819 vehicles sold.
04	Which body style is most preferred?
	SUV — 6,374 vehicles (26.66%).
05	Do high-income customers buy expensive cars?
	Not by a large difference. High-income average: \$28,148.56; low-income average: \$27,884.30. Difference: \$264.26.
06	Does gender influence car selection?
	The body-style pattern is broadly similar for both genders. SUV is the leading body style for both, with no strong practical difference visible in the dataset.
07	Do customers prefer automatic cars?
	Yes, slightly. Auto: 12,571 (52.59%); Manual: 11,335 (47.41%).
08	Which colour sells the most?
	Pale White — 11,256 vehicles (47.08%).

ADDITIONAL INSIGHTS

1. The dataset contains **23,906** vehicle sales and approximately **\$671,525,465** in revenue.

2. **Progressive Shippers Cooperative Association No** leads vehicle volume with **1,318** sales.

3. **Austin** is the highest-revenue region at approximately **\$117,192,531**.

4. **Chevrolet** is the leading manufacturer with **1,819** vehicles.

5. **SUV** accounts for **26.66%** of all sales.

6. **Diamante** is the top-selling model with **418** sales.

7. Automatic transmission has a modest lead: **52.59%** versus **47.41%** manual.

8. **Pale White** is the leading colour at **47.08%** of sales.

9. High- and low-income customers have very similar average vehicle prices, differing by only **\$264.26**.

10. **Double-Overhead Camshaft** is the most common engine type with **12,571** vehicles.

CONCLUSION

Sales are concentrated around a leading dealer, region, manufacturer, SUV body style and Pale White colour. Automatic transmission has a small lead over manual, while average vehicle prices are very similar between high- and low-income groups. The body-style pattern is also broadly similar across genders.

Note: The insights in this report are based on the available sales data and describe the patterns observed in the dataset.
